

TELMAR NETWORK TECHNOLOGY WIRELESS SERVICE SOLUTIONS

No matter the size or location of your wireless network, technology used or frequency deployed, Telmar offers turnkey wireless network solutions for wireless carriers. Our wireless solutions help maintain and implement 3G (CDMA, EVDO Rev A, GSM Edge and UMTS) and 4G (LTE, WiMAX) wireless networks, while saving CAPEX and OPEX. Our services range from network-wide repair to network planning, build-to-suit construction services and network management, and more.
