

MULTI-VENDOR NETWORK-WIDE REPAIR SOLUTIONS

Telmar Network Technology is the market leader in delivering multi-vendor, network-wide repair to global service providers, OEMs and enterprises around the world. Our diverse portfolio of repair capabilities includes over 70,000 SKUs of wireline, wireless, enterprise, customer premise equipment (CPE) and test equipment. While an OEM will normally turn around standard repairs in 45 days, Telmar's standard repair solution is completed within 15 days or less. Not only will you save money, but you'll save time with Telmar's turnkey repair solutions. Telmar also provides ongoing product development through our in-house R&D group. Listed below are some of the systems that we include in our repair program and also sell as new and certified pre-owned equipment.
