

FOR IMMEDIATE RELEASE

Telmar Network Technology Appoints Steven E. Pickett As Chief Operating Officer

Former Alcatel-Lucent Executive to Lead Telmar's Principal Lines of Business

IRVINE, CA (March 05, 2007) -- Telmar Network Technology, Inc., a leading provider of reliable, high-quality, and cost-effective solutions for network expansion, maintenance and asset management, today announced the appointment of Steven Pickett to the newly created position of Chief Operating Officer. Reporting directly to John Kidwell, Telmar's President and CEO, Mr. Pickett will assume direct responsibility for the leadership of the Company's principal lines of business, both domestically and around the globe.

Mr. Pickett joins Telmar from Alcatel-Lucent where, as Sr. Vice President/General Manager of the Optical Network Division, he was responsible for all functional areas of the Optical Network business including marketing, operations, finance, quality, services, product line management, and research and development. Prior to that assignment, Mr. Pickett served Alcatel as Vice President of Sales focused on North American customers. He has also held leadership positions with BroadBand Technologies, Inc. and NEC America.

"Steve Pickett's 20 year involvement in telecommunications, leadership experience with Alcatel-Lucent, thorough understanding of our key customers, and entrepreneurial background make him an outstanding addition to the Telmar leadership team," said John Kidwell. "I look forward to leveraging Steve's expertise as we continue to strengthen Telmar's dominant position as a comprehensive global resource for communications products and services."

Steve Pickett stated, "For many years I have witnessed Telmar's ability to provide highly reliable and cost-effective solutions to the communications marketplace," Steve continued, "I am pleased to be joining such a dynamic organization, and look forward to maintaining a sharp focus on maximizing Telmar's full potential to deliver network solutions that offer real value to our customers."
